I think the conclusion was that the site did not meet success criteria and was debited from Company Swamp. The acme mapper in previous e-mail is the location of the site to the best of my knowledge.

Hey Randy,

I don't think I ever heard back about this site. Do you know anything about it?

Thanks,

Sarah

forgot to add you on this email – do you remember anything about this site?

thanks,  
Sarah

Hey folks,

Attached is the only paperwork I found for the Borrow Pit mitigation site in Bertie County. It looks like it failed the first time around and should have been replanted in 1997-98, and there's also the note on top saying to debit it to Company

Swamp. I don't see any numbers about impacts, I don't see it or Company Swamp on the debit ledger, and there's no permit file. Anyone remember anything about this site? The file was created in 2010 I'm hoping someone can tell me SOMething.

We own a few parcels in that area and I can't get enough info on the ROD site because of how old the purchases were. Before I take Michelle up on her offer to run down to the courthouse I wanted to see what people here knew.

Thanks,  
Sarah
